This Report was prepared by Nexant, Inc. ("Nexant") and is part of ChemSystems Process Evaluation/Research Planning (PERP) Program. Except where specifically stated otherwise in this Report, the information contained herein is prepared on the basis of information that is publicly available, and contains no confidential third party technical information to the best knowledge of Nexant. The aforesaid information has not been independently verified or otherwise examined to determine its accuracy, completeness, or feasibility.

Neither Nexant, Subscriber, nor any person acting on behalf of either assumes any liabilities with respect to the use of, or for damages resulting from the use of, any information contained in this Report. Nexant does not represent or warrant that any assumed conditions will come to pass.

The Report is submitted on the understanding that the Subscriber will maintain the contents confidential except for the Subscriber's internal use. The Report shall not be reproduced, distributed, or used outside Subscriber's organization without first obtaining prior written consent by Nexant. Each Subscriber agrees to use reasonable effort to protect the confidential nature of the Report.

Contents

Section	Page
1 Summary	1
1.1 INTRODUCTION	1
1.2 BARRIER MONOMERS FOR PET	2
1.2.1 p-Phenylene Di(Oxyacetic Acid).....	4
1.2.2 m -Phenylene Di(Oxyacetic Acid).....	4
1.2.3 1,3-bis(2-Hydroxyethoxy) Benzene.....	4
1.2.4 p,p'-Biphenol	4
1.2.5 Diglycidyl Ether of Bisphenol A	4
1.2.6 Barrier Monomer Summary	4
1.3 COST ANALYSIS.....	5
1.4 PERFORMANCE OF BARRIER-ENHANCED POLYESTERS	8
1.5 GLOBAL PET MARKET OVERVIEW	9
2 Introduction	11
2.1 HIGHER-BARRIER MONOLAYER	12
2.2 MULTILAYER USING ULTRA-HIGH BARRIER	13
2.2.1 Neat Barrier Polymers.....	13
2.2.2 Nanocomposites.....	16
2.3 COATINGS	17
2.3.1 Organic Coatings	17
2.3.2 Inorganic Coatings.....	18
2.4 BLENDS/COPOLYMERS WITH HIGHER BARRIER	19
2.4.1 Blends	19
2.4.2 Copolymers.....	20
3 Specialty Monomers for Barrier Improvement	24
3.1 P-PHENYLENE DI(OXYACETIC ACID).....	24
3.2 M -PHENYLENE DI(OXYACETIC ACID)	24
3.3 1,3-BIS(2-HYDROXYETHOXY) BENZENE	24
3.4 P,P'-BIPHENOL.....	25
3.5 DIGLYCIDYL ETHER OF BISPHENOL A	27

4	Cost Analysis of Polyesters Incorporating Specialty Monomers	28
5	Performance of Barrier-Enhanced Polyesters	33
6	Commercial Analysis	38
6.1	GLOBAL OVERVIEW.....	38
6.2	UNITED STATES.....	39
	6.2.1 Demand.....	39
	6.2.2 Supply.....	40
	6.2.3 Supply/Demand.....	41
6.3	WESTERN EUROPE	42
	6.3.1 Overview.....	42
	6.3.2 Demand.....	42
	6.3.3 Supply.....	43
	6.3.4 Supply/Demand.....	45
6.4	JAPAN.....	47
	6.4.1 Demand.....	47
	6.4.2 Supply.....	50
	6.4.3 Supply/Demand.....	50
6.5	EAST ASIA	51
	6.5.1 Demand.....	51
	6.5.2 Supply.....	51
	6.5.3 Supply/Demand.....	54
	Appendix	Page
A	Elements of Nexant/Chem Systems' Capital Cost Estimates	A-1
B	Detailed Cost of Production Estimates	B-1
C	PERP Program Title Index	C-1

Figure	Page
1.1 Diacids and Diols Commercially Available	3
1.2 Specialty Barrier Monomers Description	5
1.3 Permeability vs. p-PDOAA Content.....	9
1.4 Global Polyethylene Terephthalate (PET) Demand	10
2.1 Comparison of PEN and PET Properties for Food Packaging	14
2.2 Moisture and Oxygen Barrier Properties of Selected Performance Polymers.....	15
2.3 Diacids and Diols Commercially Available	21
2.4 Routes to 1,3-Propanediol (PDO).....	22
4.1 Specialty Monomers Description.....	28
5.1 Permeability vs. p-PDOAA Content.....	35
5.2 Permeability of Biaxially-Stretched Film at Various Acid Modification, BHEB Levels	35
5.3 Oxygen Permeability for Biaxially-Stretched Film at Various BP Levels	36
5.4 Oxygen Permeability for Biaxially-Stretched Film at Various BP, BPA, and NDCA Levels.....	37
5.5 Oxygen Permeability of Unstretched Film for Various Diacid Components	37
6.1 Global Polyethylene Terephthalate (PET) Demand	38
6.2 U.S. Polyester Breakdown, 2002	39
6.3 West European PET Consumption Pattern, 2002	44
6.4 Japanese PET Food Applications, 2002.....	48
6.5 Japanese PET Non-Food Applications, 2002	48

Table	Page
1.1 Polyester End-Use Breakdown, 2003	1
1.2 Barrier Monomers for Polyesters.....	3
1.3 Derived Monomer Costs.....	6
1.4 Polymer Formulation Costs (from Theoretical Monomer Costs ONLY).....	7
1.5 Beer Shelf Life vs. Container Size.....	8
2.1 Polyester End-Use Breakdown, 2003	11
3.1 Barrier Monomers for Polyesters.....	24
4.1 Basic Input Prices	29
4.2 Derived Input Prices	30
4.3 Derived Monomer Costs.....	30
4.4 Polymer Formulation Costs (from Theoretical Monomer Costs ONLY).....	32
5.1 Beer Shelf Life vs. Container Size.....	33
5.2 Required Material Permeability vs. Shelf Life	34
6.1 U.S. Polyethylene Terephthalate Resin (PET) Demand.....	40
6.2 U.S. PET Resin Application Breakdown, 2002.....	40
6.3 U.S. PET Bottle Resin Capacity, Year-End 2002.....	41
6.4 U.S. Polyethylene Terephthalate (PET) Supply/Demand Balance.....	42
6.5 West European PET Demand Forecast.....	44
6.6 West European PET Bottle Resin Capacity, Year End 2002.....	46
6.7 West European PET Bottle Resin Supply/Demand	47
6.8 Japanese PET Forecast.....	49
6.9 Japan PET Recycle Collection Rate	50
6.10 Japanese PET Bottle Resin Capacity, Year-End 2002.....	50
6.11 Japanese Polyethylene Terephthalate (PET) Supply/Demand Balance.....	51
6.12 East Asian Polyethylene Terephthalate (PET) Demand	51
6.13 East Asian PET Bottle Resin Capacity, Year-End 2002.....	52
6.14 East Asian PET Bottle Resin Net Trade	54
