

*Acrylic Acid
and Acrylates*
91-2

February 1993

CONTENTS

	Page
I SUMMARY	1
A. INTRODUCTION	1
B. TECHNOLOGY REVIEW	1
1. Minor Processes to Acrylic Acid and Derivatives	1
2. Propylene Oxidation Process to Acrylic Acid	2
(a) Propylene to Acrolein	2
(b) Acrolein to Acrylic Acid	2
(c) Glacial Acrylic Acid Production	3
(d) Ester Production	3
C. NEW DEVELOPMENTS	5
1. Acrylic Acid Production	5
(a) Palladium-Based Oxidation Processes	5
(1) Hydroquinone Addition	5
(2) SunTech Modifications	5
(b) Improvements to the Current Process	5
(1) Dimer Decomposition/Hydroquinone Recovery	5
(2) Catalyst/Process Changes	6
2. Ester Production	7
D. COMMERCIAL REVIEW	7
1. Polyacrylic Acid Applications	10
(a) Superabsorbent Polymers	10
(b) Detergents and Water Treatment	10
2. Acrylate Ester Polymer Applications	10
(a) Textiles	10
(b) Adhesives	11
(c) Coatings	11
(d) Paper Treatment	11

CONTENTS

(Continued)

	Page
II CURRENT COMMERCIAL TECHNOLOGY	12
A. INTRODUCTION	12
B. PROPYLENE OXIDATION PROCESSES	12
1. Introduction	12
2. Single-Stage Process	13
3. Two-Stage Process	14
(a) First-Stage Catalysts	16
(b) Second-Stage Catalysts	17
4. Two-Stage Reaction Systems	18
(a) Nippon Shokubai System	18
(b) Mitsubishi Petrochemical System	18
5. Propylene Oxidation Mechanism	18
C. ACRYLIC ESTER PRODUCTION	21
1. Introduction	21
2. Alternative Acrylate Production Methods	21
(a) Reppe Process	21
(b) Acrylonitrile Process	21
(c) Ethylene Carbonylation Process	22
(d) Propionate Dehydrogenation Process	22
D. PROPYLENE OXIDATION ROUTE TO ACRYLIC ACID AND ESTERS	22
1. Acrylic Acid Process Description	22
2. Ester Production Process Description	26
3. Economics	29
(a) Raw Material Position	29
(b) Production Economics	29
4. Reppe Process Economics	35
(a) Electric Arc Process to Acetylene	35
(b) Partial Oxidation of Methane to Acetylene	36

CONTENTS (Continued)

	Page
III PROCESSES OF HISTORICAL INTEREST	38
A. ETHYLENE CYANOHYDRIN PROCESS	38
B. ACRYLONITRILE PROCESS	39
C. KETENE ROUTE TO ACRYLIC ACID	40
D. FORMALDEHYDE AND ACETIC ACID PROCESS	41
E. OXIDATIVE CARBONYLATION OF ETHYLENE	42
F. REPPE PROCESS	44
1. Original Reppe Process	44
2. Rohm & Haas Modification - Semicatalytic Route	44
3. BASF Modified Process	45
IV NEW DEVELOPMENTS	47
A. TECHNOLOGY	47
1. Introduction	47
2. Palladium Oxidation of Propylene	47
3. Propylene Oxidation Process Improvements	50
(a) Hydroquinone Recovery/Dimer Decomposition	50
(b) Catalyst and Process Changes	52
4. Acrylic Ester Production	56
(a) Methane Sulfonic Acid Catalysis	56
(b) Vapor-Phase Esterification	57
V COMMERCIAL ANALYSIS	58
A. ACRYLIC ESTER APPLICATIONS	58
1. Homopolymers	58
2. Textiles	59
3. Adhesives	60
4. Emulsion-Based Surface Coatings	60
(a) Architectural Coatings	61
(b) Industrial or Original Equipment Manufacturer Coatings	61

(c) Specialty Coatings	63
5. Paper	63

CONTENTS
(Continued)

	Page
6. Solvent-Based Surface Coatings	63
7. Other Acrylate Polymers	64
8. Specialty Acrylates	65
B. GLACIAL ACRYLIC ACID APPLICATIONS	66
1. Superabsorbent Polymers	66
(a) Toxicity	69
(b) Disposal	69
2. Polyacrylic Acid Polymers for Use in Detergents	69
3. Water Treatment	71
C. ECONOMICS	73
1. Supply	73
2. Demand	78
(a) Europe	79
(b) Japan	80
(c) United States	81
3. Supply/Demand Balance	82
4. Trade	83
5. Price	84
6. Summary	85

TABLES

		Page
Table I.B.1	U.S. Gulf Coast Production Costs, Second Quarter 1992	4
Table I.D.1	Estimated Acrylic Acid Capacity, 1992	8
Table I.D.2	Estimated Consumption of Acrylic Acid by Application, 1991	8
Table I.D.3	Semipurified Acrylic Acid Supply/Demand Balance	9
Table II.B.1	Catalysts Used in Propylene Oxidation	16
Table II.B.2	Catalysts Used in Acrolein Oxidation	17
Table II.D.1	Cost Estimate of Semipurified Acrylic Acid Production: Vapor-Phase Propylene Oxidation Process (low propylene consumption version)	30
Table II.D.2	Cost Estimate of Semipurified Acrylic Acid Production: Vapor-Phase Propylene Oxidation Process (high propylene consumption version)	31
Table II.D.3	Cost Estimate of Glacial Acrylic Acid Production: Semipurified Acrylic Acid Purification Process	32
Table II.D.4	Cost Estimate of Butyl Acrylate Production: Semipurified Acrylic Acid Esterification Process	34
Table II.D.5	Cost Estimate of Acrylic Acid: Modified Reppe Process	37
Table IV.A.1	Propylene Oxidation Using Palladium	48
Table IV.A.2	Effect of Catalyst and Gas Composition on Acrylic Acid Yield	53
Table IV.A.3	Cost Estimate of Semipurified Acrylic Acid: Vapor-Phase Propylene Oxidation (Modified Nippon Shokubai Process)	55
Table V.C.1	American Crude Acrylic Acid Capacity, 1992	74
Table V.C.2	European Crude Acrylic Acid Capacity, 1992	74
Table V.C.3	Asian Crude Acrylic Acid Capacity, 1992	75
Table V.C.4	U.S. Monomer Capacity, 1991	77
Table V.C.5	Asian Acrylate Capacity, 1991	78
Table V.C.6	European Acrylate Capacity, 1991	78
Table V.C.7	Acrylic Acid Demand by Application, 1991	79
Table V.C.8	Japanese Acrylic Acid Demand, 1991	80
Table V.C.9	U.S. Acrylic Acid Demand, 1991	82
Table V.C.10	Semipurified Acrylic Acid Supply/Demand Balance	83

FIGURES
