

*Antioxidants in Rubbers  
and Plastics*

91S1

*July 1993*

# CONTENTS

	<b>Page</b>
<b>I SUMMARY</b>	<b>1</b>
<b>III ANTIOXIDANT CHEMISTRY AND PRODUCT DESCRIPTION</b>	<b>9</b>
A. MECHANISM OF ANTIOXIDANT/ANTIOZONANT ACTION	9
B. PRODUCT DESCRIPTION AND CHEMISTRY	14
2. Secondary Antioxidants	25
(a) Phosphites and Phosphonites	25
(b) Thiodipropionate Esters (Thioesters)	28
(c) Blends	29
3. Loading Levels and Product Selection	29
<b>IV SYNTHETIC RUBBER AND PLASTICS PRODUCTION</b>	<b>31</b>
A. SYNTHETIC RUBBER	31
1. Solid Styrene-Butadiene Rubber	31
2. Polybutadiene	33
3. Ethylene-Propylene-Diene Monomer	34
B. PLASTICS	35
1. Low Density Polyethylene	35
2. Linear Low Density Polyethylene	36
3. High Density Polyethylene	37
4. Polypropylene	38
5. Polystyrene	39
6. Acrylonitrile-Butadiene-Styrene	41

<b>V</b>	<b>ANTIOXIDANT DEMAND</b>	<b>43</b>
	A. SYNTHETIC RUBBER	43
	1. Styrene-Butadiene Rubber	44
	2. Polybutadiene	46
	3. Ethylene-Propylene-Diene Monomer	47
	B. PLASTICS	48
	1. Low Density Polyethylene	49
	2. Linear Low Density Polyethylene	51
	3. High Density Polyethylene	52
	4. Polypropylene	54
	5. Polystyrene	56
	6. Acrylonitrile Butadiene Styrene	57
	C. CONCLUSIONS	59
<b>VI</b>	<b>PRODUCERS</b>	<b>66</b>
	A. INTRODUCTION	66
	B. SELECTED PRODUCER PROFILES	70
	1. United States	70
	(a) CYTEC - West Paterson, New Jersey	70
	(b) BFGoodrich - Cleveland, Ohio	71
	(c) Rhone-Poulenc - Monmouth Junction, New Jersey	71
	(d) General Electric - Fairfield, Connecticut	71
	(e) Uniroyal Chemical - Middlebury, Connecticut	72
	(f) Monsanto - St. Louis, Missouri	72
	(g) Goodyear Tire & Rubber - Akron, Ohio	73
	2. Western Europe	73
	(a) CIBA-GEIGY - Basel, Switzerland	73
	(b) EniChem Sintesi - Milan, Italy	74
	(c) Hoechst - Augsburg, West Germany	74
	(d) Chemische Werke Lowi - Waldkraiburg, Germany	76
	3. Japan	77
	(a) Nippon CIBA-GEIGY, Japan	77
	(b) Sumitomo Chemical	77
<b>VII</b>	<b>PRICES</b>	<b>78</b>
<b>VIII</b>	<b>TECHNOLOGY AND DEVELOPMENT</b>	<b>83</b>

## TABLES

		<b>Page</b>
Table I.1	Antioxidant Classes	2
Table III.B.1	Antioxidant Classes	15
Table IV.A.1	Triregional Solid SBR Production	33
Table IV.A.2	Triregional Polybutadiene Production	34
Table IV.A.3	Triregional EPDM Production	35
Table IV.B.1	Triregional LDPE Production	36
Table IV.B.2	Triregional LLDPE Production	37
Table IV.B.3	Triregional HDPE Production	38
Table IV.B.4	Triregional Polypropylene Production	39
Table IV.B.5	Triregional Polystyrene Production	41
Table IV.B.6	Triregional ABS Production	42
Table V.A.1	Average Antioxidant/Antiozonant Loading Levels	43
Table V.A.2	Estimated Triregional Demand for Primary Antioxidants/ Antiozonants Used in Solid SBR Production	45
Table V.A.3	Estimated Triregional Demand for Secondary Antioxidants Used in Solid SBR Production	45
Table V.A.4	Estimated Triregional Demand for Primary Antioxidants/ Antiozonants Used in Polybutadiene Production	46
Table V.A.5	Estimated Triregional Demand for Secondary Antioxidants Used in Polybutadiene Production	47
Table V.A.6	Estimated Triregional Demand for Primary Antioxidants Used in EPDM Production	48
Table V.B.1	Average Antioxidant Loading Levels in Selected Plastics	48
Table V.B.2	Estimated Triregional Demand for Primary Antioxidants Used in LDPE Production	50
Table V.B.3	Estimated Triregional Demand for Secondary Antioxidants Used in LDPE Production	50

Table V.B.4	Estimated Triregional Demand for Primary Antioxidants Used in LLDPE Production	51
Table V.B.5	Estimated Triregional Demand for Secondary Antioxidants Used in LLDPE Production	52
Table V.B.6	Estimated Triregional Demand for Primary Antioxidants Used in HDPE Production	53
Table V.B.7	Estimated Triregional Demand for Secondary Antioxidants Used in HDPE Production	53
Table V.B.8	Estimated Triregional Demand for Primary Antioxidants Used in Polypropylene Production	55
Table V.B.9	Estimated Triregional Demand for Secondary Antioxidants Used in Polypropylene Production	55
Table V.B.10	Estimated Triregional Demand for Primary Antioxidants Used in Polystyrene Production	57
Table V.B.11	Estimated Triregional Demand for Secondary Antioxidants Used in Polystyrene Production	57
Table V.B.12	Estimated Triregional Demand for Primary Antioxidants Used in ABS Production	58
Table V.B.13	Estimated Triregional Demand for Secondary Antioxidants Used in ABS Production	59
Table V.C.1	Estimated Triregional Demand for Primary Antioxidants by Polymer	60
Table V.C.2	Estimated Triregional Demand for Secondary Antioxidants by Polymer	61
Table V.C.3	Estimated Triregional Demand for Primary Antioxidants by Region	62
Table V.C.4	Estimated Triregional Demand for Secondary Antioxidants by Region	62

Table VI.A.1	Selected U.S. Antioxidant Suppliers	67
Table VI.A.2	Selected West European Antioxidant Suppliers	68
Table VI.A.3	Selected Japanese Antioxidant Suppliers	69
Table VI.A.4	Other Selected East Asian Antioxidant Suppliers	70
Table VII.1	Selected Regional Phenolic Antioxidant List Prices, 1993	79
Table VII.2	Selected Regional Amine Antioxidant List Prices, 1993	80
Table VII.3	Selected Regional Phosphite/Phosponite Antioxidant List Prices, 1993	81
Table VII.4	Selected Regional Thioester Antioxidant List Prices, 1993	82

## FIGURES

Figure I.1	Estimated Triregional Antioxidant Demand by Region	6
Figure I.2	Estimated Triregional Antioxidant Demand by Type	7
Figure III.B.1	Typical Structures of Monophenolic Antioxidants	18
Figure III.B.2	Typical Structures of Alkylated Bisphenolics	20
Figure III.B.3	Typical Structures of High Molecular Weight Phenolics	21-22
Figure III.B.4	Typical Structures of Amine Antioxidants	24
Figure III.B.5	Selected Phosphite/Phosponite Antioxidant Structures	27
Figure V.C.1	Estimated Triregional Antioxidant Demand by Region	64
Figure V.C.2	Estimated Triregional Antioxidant Demand by Type	65
