

*Butanediol*

91S15

*April 1993*

# CONTENTS

	<b>Page</b>
<b>I SUMMARY</b>	<b>1</b>
A. INTRODUCTION	1
B. TECHNOLOGY AND ECONOMICS	1
1. Process Technologies	1
2. Production Costs	2
C. COMMERCIAL ANALYSIS	5
1. Supply	5
(a) United States	5
(b) Western Europe	6
(c) Japan	7
2. Supply/Demand Balance	8
(a) United States	8
(b) Western Europe	9
(c) Japan	9
<b>II TECHNOLOGY AND ECONOMICS</b>	<b>11</b>
A. CHEMISTRY	11
B. COMMERCIAL 1,4-BUTANEDIOL/TETRAHYDROFURAN TECHNOLOGY	16
1. Reppe Process	16
(a) Chemistry	16
(b) Process Design	21
(1) Butynediol Synthesis	21
(2) Hydrogenation	23
2. Butadiene Acetoxylation	27
(a) Chemistry	27
(b) Process Design	29
(1) Acetoxylation	33
(2) Hydrogenation/Hydrolysis	34

(3) Tetrahydrofuran	35
(c) Investment	35
3. Pentose (Agricultural Waste) Conversion	44
(a) Chemistry	44
(b) Process Design	45
(1) Quaker Oats Process	45
(2) Tetrahydrofuran Production	48
4. Maleic Anhydride Hydrogenation	49
(a) Chemistry	49
(b) Process Design	54
(1) MAN Monoesterification and Diesterification	54
(2) Hydrogenation and 1,4-Butanediol Purification	58
5. Propylene Oxide Process	60
(a) Chemistry	60
(1) Isomerization	60
(2) Hydroformylation	61
(3) Hydrogenation	63
(b) Process Design	63
(1) Propylene Oxide Isomerization	67
(2) Hydroformylation and Extraction	68
(3) Hydrogenation and Purification	69
C. DEVELOPING TECHNOLOGY	72
1. One-Step Hydrogenation of Maleic Anhydride	72
(a) Chemistry	72
(b) Process Design	75
(1) Maleic Anhydride Dissolution in Butanol	77
(2) MBM/Butanol Solution Vaporization and Mixing with Hydrogen	77
(3) MBM Hydrogenation to Tetrahydrofuran	77
(4) Hydrogen Separation from Reaction Products	78
(5) Liquid Product Fractionation - Primary Column	78
(6) Tetrahydrofuran and Butanol Separation and Purification	79
(7) Heavies Separation	79
2. Du Pont Process	80
(a) Chemistry	80
(1) Maleic Acid	80
(2) Tetrahydrofuran	82

(b)	Process Design	84
(1)	Maleic Acid Recovery	87
(2)	Tetrahydrofuran Reaction	91
(c)	Investment	100
3.	Other Noncommercial Routes	100
(a)	Acetylene	103
(b)	Formaldehyde	103
(c)	Propylene Oxide	103
(d)	Maleic Anhydride	103
(e)	Butadiene	104
(f)	Pentoses	104
2.	Economics of Commercial Technologies	105
(a)	Basis	105
(b)	Production Costs	106
(c)	Sensitivity of Production Costs	114
3.	Economics of Developing Technologies	117

<b>III</b>	<b>COMMERCIAL ANALYSIS</b>	123
	A. APPLICATIONS	123
	1. Copolyester-Ether Thermoplastic Elastomers	123
	2. Solvents	124
	(a) Resin Solvents	125
	(1) Polyvinyl Chloride and Chlorinated Polyvinyl Chloride Pipe Cements	125
	(2) Coatings for Magnetic Tape	125
	(3) Polyvinyl Chloride Top Coatings	125
	(4) Polymerization Reactor Cleaning	125
	(5) Polyvinyl Chloride Film Casting	125
	(6) Cellophane Coatings	126
	(7) Printing Inks	126
	(b) Reaction Solvents	126
	(1) Grignard Reaction Solvent	126
	(2) Alkali Metals	126
	(3) Aluminum Hydrides and Borohydrides	127
	3. Acetylenic (Specialty) Chemicals	127
	4. Polybutylene Terephthalate	129
	(a) Introduction	129
	(b) Automotive	130
	(1) Auto Body Applications	130
	(2) Under-the-Hood Applications	130
	(3) Other Automotive Uses	131
	(c) Electrical/Electronics	131
	(d) Water Systems	131
	(e) Small Appliances	132
	(f) Other	132

5.	Polyurethane Thermoplastic Elastomers and Fibers	133
	(a) Thermoplastic Polyurethanes	134
	(b) Castable Polyurethanes	135
	(c) Reaction Injection Molding	135
	(d) Spandex Fibers	136
B.	SUPPLY	136
	1. United States	136
	2. Western Europe	140
	3. Japan	143
C.	DEMAND	145
	1. United States	145
	(a) 1,4-Butanediol	145
	(b) Tetrahydrofuran	146
	2. Western Europe	147
	(a) 1,4-Butanediol	147
	(b) Tetrahydrofuran	148
	3. Japan	149
	(a) 1,4-Butanediol	149
	(b) Tetrahydrofuran	150
D.	SUPPLY/DEMAND BALANCE	151
	1. United States	151
	2. Western Europe	152
	3. Japan	153
	<b>REFERENCES</b>	155
	<b>APPENDIX</b>	157
A	U.S. Gulf Coast Du Pont Integrated Maleic Acid/Tetrahydrofuran Process Equipment and Costs, Second Quarter 1992	
B	U.S. Gulf Coast Mitsubishi Butadiene Acetoxylation Process Equipment and Costs, Second Quarter 1992	

## TABLES

Table I.B.1	Cost of Commercial Processes for 1,4-Butanediol and Tetrahydrofuran Production	3
Table I.C.1	U.S. 1,4-Butanediol and Tetrahydrofuran Capacity, 1992	6
Table I.C.2	West European 1,4-Butanediol and Tetrahydrofuran Capacity, 1992	7
Table I.C.3	Japanese 1,4-Butanediol and Tetrahydrofuran Capacity, 1992	8
Table I.C.4	U.S. 1,4-Butanediol Supply/Demand Balance	9
Table I.C.5	West European 1,4-Butanediol Supply/Demand Balance	9
Table I.C.6	Japanese 1,4-Butanediol Supply/Demand Balance	10
Table II.B.1	Butadiene Acetoxylation Process Material Balance (pounds per hour)	37-39
Table II.B.2	Butadiene Acetoxylation Process Material Balance (mols per hour)	40-42
Table II.B.3	U.S. Gulf Coast Butadiene Acetoxylation Capital Investment Costs, 1992	43
Table II.C.1	Du Pont Transport-Bed Reactor System Process Design Parameters	82
Table II.C.2	Tetrahydrofuran Production Operating Conditions	84
Table II.C.3	Maleic Acid Production (Via Du Pont Transport-Bed Technology) Material Balance	89-90
Table II.C.4	Tetrahydrofuran Reaction Section Material Balance	93-94
Table II.C.5	Tetrahydrofuran Recovery Section Material Balance	98-99
Table II.C.6	Capital Investment Summary of U.S. Gulf Coast Production of Tetrahydrofuran from Butane/Maleic Acid, 2nd Qtr 1992	102
Table II.D.1	Cost of Production Estimate for 1,4-Butanediol/Tetrahydrofuran: Acetylene Reppe Process	107

Table II.D.2	Cost of Production Estimate for 1,4-Butanediol/ Tetrahydrofuran: Butadiene Acetoxylation Process	108
Table II.D.3	Cost of Production Estimate for Tetrahydrofuran: Pentose Process	109
Table II.D.4	Cost of Production Estimate for 1,4-Butanediol/ Tetrahydrofuran: Davy Process	110
Table II.D.5	Cost of Production Estimate for 1,4-Butanediol/ Tetrahydrofuran: ARCO via Propylene Oxide Process	111
Table II.D.6	Summary of Commercial Processes for Production of 1,4-Butanediol and Tetrahydrofuran	113
Table II.D.7	Cost of Production Estimate for Tetrahydrofuran: SOHIO Process	120
Table II.D.8	Cost of Production Estimate for Tetrahydrofuran: Du Pont Process from Butane via Maleic Acid	121
Table III.A.1	Acetylenic Chemical Applications	128
Table III.B.1	U.S. 1,4-Butanediol Capacity, 1992	136
Table III.B.2	U.S. Tetrahydrofuran Capacity, 1992	137
Table III.B.3	West European 1,4-Butanediol Capacity, 1992	141
Table III.B.4	West European Tetrahydrofuran Capacity, 1992	141
Table III.B.5	Japanese 1,4-Butanediol Capacity, 1992	143
Table III.B.6	Japanese Tetrahydrofuran Capacity, 1992	143
Table III.B.7	Recent Downstream Integrations	145
Table III.C.1	U.S. 1,4-Butanediol Demand	146
Table III.C.2	U.S. Tetrahydrofuran Demand	147
Table III.C.3	West European 1,4-Butanediol Demand	148
Table III.C.4	West European Tetrahydrofuran Demand	149
Table III.C.5	Japanese 1,4-Butanediol Demand	150
Table III.C.6	Japanese Tetrahydrofuran Demand	151
Table III.D.1	U.S. 1,4-Butanediol Supply/Demand Balance	151
Table III.D.2	U.S. Tetrahydrofuran Supply/Demand Balance	152
Table III.D.3	West European 1,4-Butanediol Supply/Demand Balance	152
Table III.D.4	West European Tetrahydrofuran Supply/Demand Balance	153

Table III.D.5	Japanese 1,4-Butanediol Supply/Demand Balance	154
Table III.D.6	Japanese Tetrahydrofuran Supply/Demand Balance	154

#### Appendix Tables

Table A.1	U.S. Gulf Coast Du Pont Integrated Maleic Anhydride/ Tetrahydrofuran Process Equipment and Costs, Second Quarter 1992 (compressors/turbines)
Table A.2	U.S. Gulf Coast Du Pont Integrated Maleic Anhydride/ Tetrahydrofuran Process Equipment and Costs, Second Quarter 1992 (exchangers/condensers)
Table A.3	U.S. Gulf Coast Du Pont Integrated Maleic Anhydride/ Tetrahydrofuran Process Equipment and Costs, Second Quarter 1992 (reaction/recovery sections)
Table A.4	U.S. Gulf Coast Du Pont Integrated Maleic Anhydride/ Tetrahydrofuran Process Equipment and Costs, Second Quarter 1992 (miscellaneous)
Table B.1	U.S. Gulf Coast Mitsubishi Butadiene Acetoxylation Process Equipment and Costs (compressor, turbines, drivers)
Table B.2	U.S. Gulf Coast Mitsubishi Butadiene Acetoxylation Process Equipment and Costs, Second Quarter 1992 (condensers/coolers)
Table B.3	U.S. Gulf Coast Mitsubishi Butadiene Acetoxylation Process Equipment and Costs, Second Quarter 1992
Table B.4	U.S. Gulf Coast Mitsubishi Butadiene Acetoxylation Process Miscellaneous Equipment and Costs
