

Ethylene/Propylene
96/97-6

March 1997

TABLE OF CONTENTS

	Page
I STRATEGIC ISSUES	1
A. DOWNSTREAM (ETHYLENE) INTEGRATION	1
1. The Issue of Integration	1
2. The Commodity Pricing Cycle	2
3. Implications	3
B. UPSTREAM (REFINING) INTEGRATION	4
1. Logistics	4
2. Hydrogen	5
3. Aromatic Integration	5
4. Fuel System Integration	5
5. Odd Feedstock Streams	6
II CURRENT COMMERCIAL TECHNOLOGY	7
A. ETHYLENE	7
1. Feedstocks	7
(a) Supply	7
(1) Natural Gas Liquids	7
(2) Liquids	7
(b) Selection & Yield	8
(c) Feedstock Flexibility	12
(1) Flexibility from an Investment Viewpoint	12
(2) Feedstock Flexibility - Operating Issues	16
(3) Feedstock Value Relationships	16
(d) Coproduction from Liquid Crackers	18
(1) Cracking Severity	18
(2) Coproduct Markets and Alternatives	18
2. Various Flow Schemes	21
(a) Demethanizer-First Sequence	22
(b) Deethanizer-First Sequence	26
(c) Depropanizer-First Sequence	29
(d) Flow Scheme Configuration Conclusions	31

TABLE OF CONTENTS (Continued)

	Page
3. Investment/Construction Schedule	32
4. Ethylene Technology Licensors	35
(a) Stone & Webster	36
(b) M.W. Kellogg	36
(c) ABB Lummus	37
(d) KTI	38
(e) TPL/Technip	38
(f) Linde AG	38
(g) Brown and Root Braun	39
5. Economic Analysis	39
(a) Driving Forces for Ethylene Cracker Feedstock Pricing	39
(1) Overall Nature of Cracker Feedstock Markets	40
(2) Specific Drivers for Key Cracker Feedstock Prices	42
(b) Key Cracker Feedstock Sources and Global Trade	44
(1) Global Trade Factors	44
(2) Other Factors	46
(c) Basis for Production Economics	48
(1) Price Basis	48
(2) Investment Basis	50
(3) Production Cost Basis	50
(d) Production Cost	51
(e) Product Price Sensitivity	62
(1) Impact of Propylene/Ethylene Price Ratio	62
(2) Effect of NGL Prices on the Relative Cracking Economics of Light Versus Heavy Feedstocks	64
B. PROPYLENE	66
1. Introduction	66
2. Conventional Steam Cracking	66
3. Recovery from Refinery Streams	69
4. Propane Dehydrogenation	71

TABLE OF CONTENTS (Continued)

	Page
III NEW DEVELOPMENTS	75
A. ADVANCED LOW CAPITAL ETHYLENE TECHNOLOGY (ALCET)	75
B. SELECTIVE OLEFIN RECOVERY (SOR)	81
C. APPLICATION OF CATALYTIC DISTILLATION (CDHydro™)	86
D. CATALYTIC PYROLYSIS	88
E. METHANOL TO OLEFINS	90
IV COMMERCIAL STATUS	91
A. ETHYLENE	91
1. United States	91
(a) Feedstock Availability	91
(1) Ethane/Propane	91
(2) Gas Oil	92
(b) Demand	92
(c) Supply	95
(1) Expansions	95
(2) New Plants	98
(d) Supply/Demand Balance	99
2. Western Europe	99
(a) Demand	99
(b) Supply	102
(c) Supply/Demand Balance	106
3. Asia	108
B. PROPYLENE	112
1. United States	112
(a) Demand	112
(b) Supply	114
(1) Steam Cracker Propylene	114
(2) Refinery Propylene	115

**TABLE OF CONTENTS
(Continued)**

	Page
(c) Supply/Demand Balance	116
(d) Capacity	117
2. Western Europe	120
(a) Consumption	120
(b) Supply	122
(1) Steam Crackers	125
(2) Refineries	125
(3) Propane Dehydrogenation	127
(4) Trade	127
(c) Supply/Demand Balance	128
3. Asia	130
