

*Developments in Alpha Olefin
Production Technology*
97/98S14

January 1999

TABLE OF CONTENTS

	Page
I EXECUTIVE SUMMARY	1
A. BACKGROUND	1
B. REVIEW OF CURRENT COMMERCIAL OLIGOMERIZATION PROCESSES	1
1. Chevron One Stage Ethylene Oligomerization Process	2
2. Amoco Two Stage Ethylene Oligomerization Process	3
3. Shell Higher Olefins Process (SHOP)	5
(a) Ethylene Oligomerization	6
(b) Isomerization	6
(c) Disproportionation or Metathesis	6
C. BP'S APPROACH TO ALPHA-OLEFIN PRODUCTION	7
D. UOP'S ALPHA-OLEFIN PROCESS	10
E. IFP'S ALPHA-OLEFIN PROCESS	11
F. ECONOMICS	12
1. BP's Route to Butene-1	12
2. UOP's Route to LAOs	14
3. IFP's Route to LAOs	14
4. Other Commercial Routes to LAOs	14
5. Conclusions	15
G. COMMERCIAL	15
1. Applications	15
2. Supply and Demand	17
(a) Capacity	17
(b) Demand	17
II INTRODUCTION AND CHEMISTRY	20
A. BACKGROUND	20
B. CONVENTIONAL OLIGOMERIZATION CHEMISTRY	22
C. BP'S APPROACH TO ALPHA-OLEFIN PRODUCTION	30
D. CHEMISTRY FOR THE NEW UOP ALPHA-OLEFIN PROCESS	33
E. CHEMISTRY FOR THE NEW IFP ALPHA-OLEFIN PROCESS	34

TABLE OF CONTENTS (Continued)

	Page
III TECHNOLOGY	36
A. REVIEW OF CURRENT COMMERCIAL OLIGOMERIZATION PROCESSES	36
1. Chevron One Stage Ethylene Oligomerization Process	36
(a) Process Description	36
(b) Product Spectrum	38
2. Amoco Two Stage Ethylene Oligomerization Process	39
(a) Process Description	39
(b) Product Spectrum	40
3. Shell Higher Olefins Process (SHOP)	43
(a) Process Description	43
(1) Ethylene Oligomerization	43
(2) Isomerization	43
(3) Disproportionation or Metathesis	45
(b) Product Spectrum	45
4. Phillips's Hexene-1 Process	46
(a) Background	46
(b) Process Description	47
B. BP'S APPROACH TO ALPHA-OLEFIN PRODUCTION	49
C. UOP'S LINEAR-1™ PROCESS	53
D. IFP'S ALPHASELECT™ PROCESS	56
 IV ECONOMICS	 59
A. BASIS	59
1. Pricing Basis	59
2. Investment Basis	60
3. Cost of Production Basis	60
B. COST OF PRODUCTION	61
1. BP's Route to Butene-1	61
2. UOP's Route to LAOs	64
3. IFP's Route to LAOs	64
4. Other Commercial Routes to LAOs	64
C. SENSITIVITIES	72
D. CONCLUSIONS	72

**TABLE OF CONTENTS
(Continued)**

	Page
V MARKET ANALYSIS	76
A. APPLICATIONS	76
1. Introduction	76
2. Polymers	76
3. Detergents	78
4. Lubricants	80
5. Plasticizers	81
6. Miscellaneous Applications	82
B. SUPPLY AND DEMAND	86
1. Capacity	86
2. Demand	89
3. Supply and Demand	92
 REFERENCES	 94

TABLES

		Page
Table I.B.1	Estimate of Typical Chevron Process Product Spectrum	3
Table I.B.2	Estimate of Typical Product Spectrum for the Amoco Process	5
Table I.B.3	Estimate of Typical Product Spectrum for the SHOP Process	7
Table I.C.1	BP Ethylene Oligomerization and Metathesis Results	9
Table I.D.1	Alpha-Olefin Distribution in UOP's Linear-1™ Process	10
Table I.E.1	Alpha-Olefin Distribution in IFP's AlphaSelect™ Process	11
Table I.G.1	LAO Capacity, 1997 (Year End)	18
Table I.G.2	Global Alpha-Olefin Consumption by End Use, 1996-2010	19
Table II.A.1	Typical Properties – Linear Alpha-Olefins	21
Table II.B.1	Theoretical Weight Distribution of Alpha-Olefins Produced by Single Stage Ziegler Oligomerization of Ethylene	24
Table II.B.2	Theoretical Weight Distribution of Alpha-Olefins Produced by Two Stage Ethylene Oligomerization, Poisson Distribution	25
Table II.C.1	BP Ethylene Oligomerization and Metathesis Results	32
Table II.D.1	Alpha-Olefin Distribution in UOP's Linear-1™ Process	33
Table II.E.1	Alpha-Olefin Distribution in IFP's AlphaSelect Process	34
Table III.A.1	Estimate of Typical Chevron Process Product Spectrum	38
Table III.A.2	Estimate of Typical Product Spectrum for the Amoco Process	42
Table III.A.3	Improved Product Spectrum for the Amoco Process	42
Table III.A.4	Estimate of Typical Product Spectrum for the SHOP Process	46
Table III.B.1	BP Process Investment	52
Table IV.A.1	Price and Utility Basis	59
Table IV.B.1	Cost Estimate of Butene-1 Production via BP's Process	62
Table IV.B.2	Cost Estimate of Butene-1 Production via IFP's Alphabuto™ Process	63
Table IV.B.3	Cost Estimate of Linear Alpha-Olefin Production via UOP's Linear-1™ Process	65
