

*Biotransformation Routes to 1,3-
Propanediol*
97/98S4

September 1998

TABLE OF CONTENTS

	Page
I EXECUTIVE SUMMARY	1
A. OVERVIEW	1
B. PROCESS ECONOMICS	2
1. 1,3-Propanediol	2
2. Polytrimethylene Terephthalate	5
C. MARKET ANALYSIS	7
1. Overview	7
2. Potential polymer derivatives of 1,3-Propanediol	8
(a) Thermoplastic Polyurethanes (TPUs)	8
(b) Polybutylene Terephthalate (PBT)	9
(c) Copolyester Ethers (COPEs)	10
D. STRATEGIC VIEW	11
II INTRODUCTION	13
A. OVERVIEW	13
B. PETROCHEMICAL PROCESS DEVELOPMENTS	14
C. MARKET OPPORTUNITIES FOR 1,3-PROPANEDIOL	15
D. BIOTRANSFORMATION PROCESSES FOR 1,3-PROPANEDIOL	17
E. OUTLINE OF THE STUDY	18
F. GLOSSARY OF BIOTRANSFORMATION TECHNOLOGY	19
1. General Terms	19
2. Specific Terms	20
III PETROCHEMICAL ROUTES TO 1,3-PROPANEDIOL	21
A. OVERVIEW	21
B. 1,3-PROPANEDIOL FROM ETHYLENE OXIDE	22
1. Chemistry	22
2. Process Description	25
C. 1,3-PROPANEDIOL FROM ACROLEIN	29
1. Chemistry	29
2. Process Description	30
IV BIOTRANSFORMATION ROUTES TO 1,3-PROPANEDIOL	33
A. HISTORICAL VIEW	33
B. BIOTRANSFORMATION CHEMISTRY	35
1. 1,3-Propanediol from Glycerol	35
(a) Overview	35
(b) Metabolism of Glycerol	35
(c) Factors Affecting the Yield of 1,3-Propanediol	38
(d) Bacterial Strain Improvements	40
2. 1,3-Propanediol from Glucose	40
(a) Overview	40
(b) Metabolism of Glucose (Theoretical Approach)	41
(c) Potential for Sugar-Based Routes to 1,3-Propanediol	42

TABLE OF CONTENTS (Continued)

	Page
C. PROCESS DESIGN	45
1. Introduction	45
(a) Kinetics of 1,3-Propanediol Production	45
(b) Base Case Approach for 25 000 tons per year 1,3-Propanediol Facility	46
2. Batch Process	46
(a) Fermentation	46
(1) Fermentation Strategy	46
(2) 1,3-Propanediol Production from Fermentation	47
(3) Potential Improvements Through Strain Development	49
(b) Downstream Processes and Purification of 1,3-Propanediol	51
(1) Buffer Storage	51
(2) Cell Separation	51
(3) Enrichment	52
(4) Solids Removals from the Bottoms Products	52
(5) Production of Anhydrous 1,3-Propanediol	53
3. Continuous Fermentation	53
(a) Fermentation	53
(b) Downstream Processes and Purification of 1,3-Propanediol	54
D. Next Steps	56
V PROCESS ECONOMICS	57
A. OVERVIEW	57
1. Cost of Production Methodology	57
(a) Battery Limits	57
2. Production Costs	57
(a) Labor and Related Overheads	57
(b) Variable Costs	58
(c) Direct Fixed Costs	58
(d) Allocated Fixed Costs	58
(e) Financing	58
3. Process Feedstocks	59
B. CONVENTIONAL TECHNOLOGY	60
C. BIOTRANSFORMATION TECHNOLOGY	65
1. Overview	65
2. Glycerol Based Processes	65
3. Glucose Based Processes	67
D. COST COMPARISONS – PETROCHEMICAL VERSUS BIOCHEMICAL	76
1. 1,3-Propanediol Production	76
2. Polytrimethylene Terephthalate	79
E. CONCLUSIONS	82
VI COMMERCIAL STATUS	84
A. NEW APPLICATIONS FOR 1,3-PROPANEDIOL (PDO)	84
B. POLYTRIMETHYLENE TEREPHTHALATE FOR CARPET FIBER	87

TABLE OF CONTENTS (Continued)

	Page
C. MARKETS FOR POLYMERS BASED ON 1,4-BUTANEDIOL	92
1. Overview	92
(a) Polyurethane Thermoplastics Elastomers and Fibers	92
(1) Thermoplastics Polyurethanes	92
(2) Castable Polyurethanes	94
(3) Reaction Injection Molding	95
(b) Polybutylene Terephthalate	96
(1) Introduction	96
(2) Automotive	98
(3) Electrical/Electronics	99
(4) Water Systems	99
(5) Small Appliances	100
(6) Miscellaneous	100
(c) Copolyester Ethers	101
2. United States	103
(a) Thermoplastics Polyurethanes	103
(1) Demand	103
(2) Production	103
(3) Supply/Demand Balance and Projections	105
(b) Polybutylene Terephthalate	107
(1) Demand	107
(2) Production	108
(3) Supply/Demand Balance and Projections	109
(c) Copolyester Ethers	112
(1) Demand	112
(2) Production	112
(3) Supply/Demand Balance and Projections	113
3. Western Europe	115
(a) Thermoplastic Polyurethanes	115
(1) Demand	115
(2) Production	116
(3) Supply/Demand Balance and Projections	117
(b) Polybutylene Terephthalate	120
(1) Demand	120
(2) Production	120
(3) Supply/Demand Balance and Projections	121
(c) Copolyester Ethers	124
(1) Demand	124
(2) Production	124
(3) Supply/Demand Balance and Projections	125
4. Japan	127
(a) Thermoplastic Polyurethanes	127
(1) Demand	127
(2) Production	127
(3) Supply/Demand Balance and Projections	129

TABLE OF CONTENTS (Continued)

	Page
(b) Polybutylene Terephthalate	131
(1) Demand	131
(2) Production	131
(3) Supply/Demand Balance and Projections	132
(c) Copolyester Ethers	134
(1) Demand	134
(2) Production	135
(3) Supply/Demand Balance and Projections	135
5. Other Regions	137
VII STRATEGY ISSUES	138
A. THE POTENTIAL IMPACT OF BIOTRANSFORMATION TECHNOLOGY	138
B. BIOTECHNOLOGY COMMERCIAL TRENDS	139
C. BIOTRANSFORMATIONS FOR SPECIALTY ORGANIC CHEMICALS	141
1. Overview	141
2. Chiral Intermediates	141
3. Agrochemicals	143
D. REVOLUTION IN THE MAKING	143
VIII REFERENCES	144
A. GENERAL REFERENCES	144
B. SPECIFIC REFERENCES	144
APPENDICES	
I BIOCHEMICAL ROUTE TO 1,3 PROPANEDIOL FROM GLUCOSE	145
1. Glucose to Dihydroxyacetone Phosphate and 3-Phosphoglyceraldehyde	145
2. Conversion to 3-GP to lactate	146
3. Conversion of DHAP to Glycerol 3-Phosphate and Glycerol	146
4. Glycerol Conversion to PDO	146
5. Rationalization	147
II EQUIPMENT LISTS FOR BATCH AND CONTINUOUS FERMENTATION PROCESSES FOR 1,3 PROPANEDIOL	150
III PRICE INFORMATION AND COST OF PRODUCTION ESTIMATES FOR KEY FEEDSTOCKS FOR 1,3 PROPANEDIOL	152

TABLES

		Page
Table I.B.1	Basecase Cost Comparison of 1,3-Propanediol Production Costs Petrochemical Versus Biochemical	3
Table I.B.2	Cost of Production Summary for PTT Effect of PTA Back-Integration and 1,3-PDO Source	6
Table I.D.1	Commercialization of Biotechnologies for Chemicals Production	11
Table I.D.2	Some Typical Biotransformations of Commercial Importance	12
Table IV.B.1	Theoretical Glycerol Metabolization Yields from Clostridium Butyricum	39
Table IV.C.1	Growth Parameters for Clostridium Butyricum	45
Table IV.C.2	Bio-Process Design Parameters with Critical PDO Concentration at 71.4g/l	50
Table IV.C.3	Bio-Process Design Parameters with Critical PDO Concentration at 102.0g/l	50
Table IV.C.4	Continuous Bio-Process Design Parameters with Critical PDO Concentration at 71.4g/l	54
Table V.B.1	Cost of Production Estimate for : 1,3-Propanediol Process: Shell – Ethylene Oxide Hydroformylation (Base Case)	60
Table V.B.2	Cost of Production Estimate for : 1,3-Propanediol (Base Case) Process: Degussa/DuPont Acrolein Hydration/Hydroformylation	61
Table V.B.3	Basecase Cost Comparison of 1,3-Propanediol Production	62
Table V.B.4	Cost Comparison of 1,3-Propanediol Production Effect of Integration	63
Table V.C.1	Cost of Production Estimate for : 1,3-Propanediol Process: DuPont Genencor Batch Glycerol Biotransformation	66
Table V.C.2	Cost of Production Estimate for : 1,3-Propanediol Process: DuPont Genencor Batch Glycerol Biotransformation (Improved)	68
Table V.C.3	Cost of Production Estimate for : 1,3-Propanediol Process: DuPont Genencor Batch Glucose Biotransformation (Base Case)	69
Table V.C.4	Cost of Production Estimate for : 1,3-Propanediol Process: DuPont Batch Genencor Glucose Biotransformation (Improved)	70
Table V.C.5	Basecase Cost Comparison of Batch Biotransformation 1,3-Propanediol Production	71
Table V.C.6	Basecase Cost Comparison of Continuous Biotransformation 1,3-Propanediol Production	71
Table V.D.1	Basecase Cost Comparison of 1,3-Propanediol Production Costs Petrochemical Versus Biochemical	77
Table V.D.2	Cost of Production for : Polytrimethylene Terephthalate (Low I.V.) Process: Continuous Melt-Phase	80
Table V.D.3	Cost of Production Summary for PTT Effect of PTA Back-Integration and 1,3-PDO Source	81
