| <b>I EXECUTIVE SUMMARY</b>                       | <b>1</b>    |
| A. INTRODUCTION                                  | 1           |
| B. PROCESS DESCRIPTION                           | 3           |
| C. CAPITAL INVESTMENT                            | 5           |
| D. PRODUCTION COSTS                              | 6           |
| E. CONCLUSIONS                                   | 8           |
| F. COMMERCIAL                                    | 8           |
| 1. Ethane Demand                                 | 8           |
| 2. Ethylene Supply/Demand Balance                | 9           |

| <b>II TECHNOLOGY</b>                             | <b>13</b>   |
| A. INTRODUCTION                                  | 13          |
| B. CHEMISTRY                                     | 14          |
| 1. General Thermodynamics and Kinetics           | 14          |
| 2. Dow Patent                                    | 15          |
| 3. Other Patent Results                          | 18          |
| C. PROCESS DESCRIPTION                           | 18          |
| 1. Dehydrogenation Section                       | 20          |
| 2. Compression Section                           | 20          |
| 3. Separation Section                            | 21          |
| D. MATERIAL BALANCE                              | 23          |
| E. CONVENTIONAL ETHANE STEAM CRACKING TECHNOLOGY | 25          |
| 1. Pyrolysis Section                             | 25          |
| 2. Compression Section                           | 28          |
| 3. Separation Section                            | 29          |
